

RAFAEL CARVALHO

JUNIOR PROGRAMMER

I am a proactive and creative professional with technical training in software development and a strong interest in programming. I've built personal projects such as a 3D billiards game, where I worked on logic, physics, and graphical interface. I learn new technologies quickly, enjoy working in teams, and thrive on solving real-world problems. I'm looking for my first opportunity as a junior developer to apply my skills and grow through hands-on projects.

FORMAÇÃO ACADÉMICA

October 2023 – Present
Professional Higher Technical Course in Data Protection and Information Systems Security
Instituto Politécnico do Cávado e do Ave, Braga

September 2020 – July 2023
Vocational Course in IT Systems Management and Programming
Escola Secundária D. Maria II, Braga

May 2023
Erasmus Youth 4 Bauhaus – Braga, Portugal

November 2022
Erasmus Youth 4 Bauhaus – Ghent, Belgium

September 2022
Apps for Good – National Finalist

July 2022
Apps for Good – Group Phase

Honor Student: Recognized for academic excellence throughout all school years.

SKILLS

- **Languages:** Python, JavaScript, HTML, CSS, SQL, C#
- **Tools:** VS Code, WordPress, Trello, MySQL
- **Other:** Problem solving, teamwork, creativity, fast learner

LANGUAGES

- Portuguese ★★★★★
- English ★★★☆☆
- Portuguese Sign Language ★★★★★

PROGRAMMING PROJECTS

3D Billiards Game (2023)
Developed in C# over six months as a school project. The game simulates realistic physics (collisions, friction, ball movement), has a graphical interface, score system, different camera angles, reset function, and local multiplayer mode.

Faced and solved technical challenges, especially with collision logic and gameplay mechanics, using forums, tutorials, and documentation.

EXPERIÊNCIA PROFISSIONAL

DATTAPRIVACY+LDA

- Drafted Data Processing Activity Records (RATs), privacy and cookie policies, and CCTV regulations
- Managed institutional content and updated website via WordPress
- Used Trello, Word, and Excel for internal collaboration and task management

CRUZ VERMELHA

- Installed and maintained operating systems
- Handled technical tickets and PC/domain integrations
- Backed up router settings and improved infrastructure performance

ACADEMIC TALKS

- As part of the Professional Higher Technical Course in Data Protection and Information Systems Security, which I am currently attending, I had the opportunity to engage with companies such as IKEA and PHC through academic talks and events.
