Profile

Second-year student of the Digital Game Design TeSP (higher technical professional course) at IPCA, looking for a 840-hour curricular internship in game programming starting February 2027. I work with Unity and C#, focused on gameplay, game systems, physics, UI and tools. I am deaf and work best in written communication (email, Slack, Discord, Teams, Jira). I use Portuguese Sign Language.

Projects

Atom Gauntlet: Protocol (Unity, C#; team project) — 3D action game and my main project, available to download on itch.io. I implemented:

- combat and weapons system
- energy management
- checkpoints and save system
- dialogues and environment interaction

3D Billiards Simulator (Unity, C#) — physics for collisions, friction and ball movement, user interface, scoring, several camera angles, reset and local multiplayer. Six-month school project (2023).

Integrated Project, 2nd year (ongoing, team project) — 3D horror game with emotion masks, built as part of the Digital Game Design course.
